Background

The globalisation of the pharmaceutical supply chain has created new challenges for the manufacture and supply of medicinal products in various markets. The expected approach to the application of requirements can sometimes be unclear, especially where master distributors act solely as financial trading organisations where physical handling of products is not directly involved.

Educational Objectives

- The supply chain model and involvement of marketing authorisation holders in the distribution network.
- The role of WDA / License holder management representatives.
- The role of the Responsible Person when product handling is not involved.
- Quality System; handling of complaints, returns, suspected falsified medicinal products and medicinal product recalls etc.
- Qualification of customers and approval of suppliers.
- Control of outsourced activities and establishment of Quality / Technical Agreements.
- Definition and review of the integrated supply chain (Supply chain mapping).
- Validation of computerised systems, and processes used in financial distribution.

Target Audience

The webinar is aimed at WDA / License holder management representatives, Responsible Persons, and personnel in key positions within pharmaceutical trading organisations involved in, and accountable for:

- Financial procurement and supply transactions,
- Quality Assurance activities (i.e. approval of customers, suppliers, vendors),
- Creation and maintenance of IT master data (customer/supplier details),
- Managing the interface with the physical Supply Chain including third party vendors.
